

## KS3 Assessment Criteria: ICT

		-11 1	<b>-11.</b> 1	
	Flight Path 1:	Flight Path 2:	Flight Path 3:	Flight Path 4:
	GCSE grades 1 and above	GCSE grades 2 and above	GCSE grades 4 and above	GCSE grades 6 and above
Year 7	Mastery Indicators  Digital literacy  • you will have some understanding of issues surrounding E-Safety and a basic understanding of the measures you can take to keep yourself safe whilst online.  History of Computers  • you will have some understanding of history of computer and a basic understanding of current technology and future developments.	Mastery Indicators Digital literacy • you will have a good understanding of issues surrounding E-Safety and a reasonable understanding of the measures you can take to keep yourself safe whilst online.  History of Computers • you will have good understanding of history of computer and a reasonable understanding of current technology and future developments.	Mastery Indicators Digital literacy • you will have an excellent understanding of issues surrounding E-Safety and an excellent understanding of the measures you can take to keep yourself safe whilst online History of Computers • you will have an excellent understanding of history of computer and a good understanding of current technology and future developments.	Mastery Indicators Digital literacy  • you will have an outstanding understanding of issues surrounding E-Safety and an excellent understanding of the measures you can take to keep yourself safe whilst online  History of Computers  • you will have an outstanding understanding of history of computer and an excellent understanding of current technology and future developments.
	<ul> <li>Data representation</li> <li>Understand how to decode a single string of binary information</li> <li>Computer Systems</li> <li>You will have some understanding of the difference between input and output devices and some level of understanding of how computers work and some understanding of embedded</li> </ul>	<ul> <li>Data representation</li> <li>Understand how to code and decode strings of binary information</li> <li>Computer Systems</li> <li>You will have a good understanding of the difference between input and output devices and a good level of understanding of how computers work and some understanding of embedded systems</li> </ul>	<ul> <li>Data representation</li> <li>Understand how to perform binary addition</li> <li>Computer Systems</li> <li>You will have an excellent understanding of the difference between input and output devices and an excellent level of understanding of how computers work and some understanding of embedded systems</li> </ul>	<ul> <li>Data representation</li> <li>Understand how to imitate a binary shift to the left and right and understand its effects.</li> <li>Computer Systems</li> <li>You will have an outstanding understanding of the difference between input and output devices and an outstanding level of understanding of how computers work and some understanding of embedded systems</li> </ul>
	systems  Computer Networks  You will have some understanding what is meant by a Local Area Network (LAN) and some understanding what is meant by a Wide Area Network (WAN) and how to keep your computer secure on a computer network.	Computer Networks  • You will have good understanding what is meant by a Local Area Network (LAN) and good understanding what is meant by a Wide Area Network (WAN) and how to keep your computer secure on a computer network	Computer Networks     You will have excellent understanding what is meant by a Local Area Network (LAN) and excellent understanding what is meant by a Wide Area Network (WAN) and how to keep your computer secure on a computer network  Computational Thinking	Computer Networks     You will have outstanding understanding what is meant by a Local Area Network (LAN) and excellent understanding what is meant by a Wide Area Network (WAN) and how to keep your computer secure on a computer network  Computational Thinking
	<ul> <li>Computational Thinking</li> <li>You will have some understanding of the concepts of Computational Thinking to a range of problemsolving activities and some understanding of how to solve problems independently and logically.</li> </ul>	<ul> <li>Computational Thinking</li> <li>You will have good understanding of the concepts of Computational Thinking to a range of problemsolving activities and good understanding of how to solve problems independently and logically.</li> </ul>	You will have excellent understanding of the concepts of Computational Thinking to a range of problem-solving activities and excellent understanding of how to solve problems independently and logically.	You will have outstanding understanding of the concepts of Computational Thinking to a range of problem-solving activities and outstanding understanding of how to solve problems independently and logically

## KS3 Assessment Criteria: ICT

	Flight Path 1: GCSE grades 1 and above	Flight Path 2: GCSE grades 2 and above	Flight Path 3: GCSE grades 4 and above	Flight Path 4: GCSE grades 6 and above
Year 8	Mastery Indicators Data representation  Understand how to decode a single string of binary information  Computer Systems  You will have some understanding of the difference between input and output devices and some level of understanding of how computers work and some understanding of embedded systems  Python Programming  You will have some understating of python and some understanding of the basic functions and improve programming efficiency.  Microsoft Office: (Database Module, Spreadsheet Module, PowerPoint Module, Publisher Module  You will have some understating of Microsoft Office and some understanding of the basic functions within the packages.  HTML  You will have some understanding of how to create a webpage using an online editor and how to perform some basic functions.	Mastery Indicators Data representation  Understand how to code and decode strings of binary information  Computer Systems  You will have a good understanding of the difference between input and output devices and a good level of understanding of how computers work and some understanding of embedded systems  Python Programming  You will have a good understating of python and a good understanding of the basic functions and improve programming efficiency.  Microsoft Office: (Database Module, Spreadsheet Module, PowerPoint Module, Publisher Module  You will have a good understating of Microsoft Office and a good understanding of the basic functions within the packages.  HTML  You will have a good understanding of how to create a webpage using an online editor and how to perform some functions.	Mastery Indicators Data representation  Understand how to perform binary addition  Computer Systems  You will have an excellent understanding of the difference between input and output devices and an excellent level of understanding of how computers work and some understanding of embedded systems  Python Programming  You will have an excellent understating of python and an excellent understanding of the basic functions and improve programming efficiency.  Microsoft Office: (Database Module, Spreadsheet Module, PowerPoint Module, Publisher Module  You will have an excellent understating of Microsoft Office and an excellent understanding of the functions within the packages.  HTML  You will have an excellent good understanding of how to create a webpage using an online editor and how to perform some functions.	Mastery Indicators Data representation  • Understand how to imitate a binary shift to the left and right and understand its effects.  Computer Systems  • You will have an outstanding understanding of the difference between input and output devices and an outstanding level of understanding of how computers work and some understanding of embedded systems  Python Programming  • You will have an outstanding understating of python and an outstanding understanding of the basic functions and improve programming efficiency.  Microsoft Office: (Database Module, Spreadsheet Module, PowerPoint Module, Publisher Module  • You will have an outstanding understating of Microsoft Office and an outstanding understanding of the functions within the packages  HTML  • You will have an outstanding understanding of how to create a webpage using an online editor and how to perform some functions.
